

Amendments to the Specification

Please replace the paragraph beginning on page 5, line 8, with the following replacement paragraph:

The captured images from the digital camera 10 can be downloaded to the host computer 40 and stored on a hard drive 56 under the control of a central processing unit (CPU) 50 which may be a Pentium processor manufactured by Intel Corporation, Santa Clara, California, running the Windows 98 Operating System developed by Microsoft Corporation, Redmond, ~~Oregon~~ Washington. The CPU 50 is directly coupled to a display monitor 52, which is used to view the images, and a keyboard 54. A mouse 55 permits the user to readily communicate with the CPU 50. The CPU 50 is in direct communication with a local printer 58, such as an Epson Stylus Photo 700 printer, which produces hard copy prints of the images captured by the digital camera 10.
